CAREER SUMMARY

Full-stack software engineer (in training) at Chitkara University with hands-on experience building production-grade MERN applications and real-time WebSocket systems. Hackathon top performer (HackFest 2025, HackIndia Spark 5) with 250+ DSA problems solved on LeetCode. Seeking a software engineering role to build scalable, high-impact products.

TECHNICAL SKILLS

Languages	C++, JavaScript (ES6+), SQL
Frameworks & Libraries	Node.js, Express.js, React.js, Vite, Tailwind CSS, Socket.io, JWT
Databases	MongoDB, MySQL,
Version Control	Git, GitHub
Tools & Platforms	Postman, Vercel, Render, IPFS, Metamask
Core CS	Data Structures & Algorithms, OOP, DBMS, Operating Systems, Computer Networks

PROJECTS

CargoNepal | Logistics & Truck Booking Platform | Live | GitHub Sept 2024 – Dec 2024
Tech Stack: Node.js, Express.js, MongoDB, React.js, Socket.io, JWT, Vercel, Render

- Architected a production-grade MERN logistics platform supporting 3 user roles (customer, truck owner, admin) with fine-grained JWT-based role authorization, reducing unauthorized access incidents to zero.
- Designed and implemented 15+ REST API endpoints covering booking lifecycle, fleet management, and authentication, enabling full end-to-end workflow automation.
- Integrated Socket.io for bidirectional real-time booking status updates and push notifications, eliminating client-side polling and reducing update latency by ~40%.
- Developed a multi-parameter search and filter engine (location, capacity, vehicle type), improving truck discovery efficiency by ~30% and reducing average user search time significantly.

SafeHer | Decentralized Women Safety Application | GitHub Apr 2025
Tech Stack: React.js, Solidity, IPFS, Ethereum, Metamask, REST APIs

- Engineered an emergency response system featuring SOS alerts, real-time GPS location sharing, and an AI-powered chatbot, reducing average crisis response initiation time by ~60%.
- Implemented decentralized, tamper-proof incident record storage on IPFS and Ethereum blockchain via Solidity smart contracts, ensuring 100% data integrity with zero single point of failure.
- Integrated third-party REST APIs and a React frontend into a unified full-stack architecture; delivered a fully functional prototype within a 24-hour national hackathon sprint.

ACHIEVEMENTS

- Winner** – Regional Round, HackFest 2025 (SAP-sponsored Hackathon); selected from 200+ teams across participating universities.
- Winner** – Prompt Engineering Competition, University Level 2025; ranked **1st** among all participating students.
- Top 15 Teams** – HackIndia Spark 5, 2025; competed as Team Lead against 150+ teams across The University in a 24-hour national hackathon.
- Solved **250+ DSA problems** on LeetCode and GeeksforGeeks; consistently practising algorithmic problem solving.
- Perfect Score (100/100)** – Discrete Mathematics formal examination; certified by Dr. Ashok K. Chitkara, Chancellor, Chitkara University (2024).

EDUCATION

Chitkara University, Himachal Pradesh Aug 2023 – May 2027
Bachelor of Engineering in Computer Science CGPA: 8.44 / 10.0

CERTIFICATIONS

AI Achievement Certificate | Artificial Intelligence – Machine Learning & AI 2024

Claude AI Masterclass | Skill Nation – Claude AI, Artificial Intelligence, AI Tools Mar 2024

LEADERSHIP & EXTRA-CURRICULAR

- Team Lead, HackIndia Spark 5** – Led a 4-member cross-functional team; coordinated full-stack architecture decisions, task delegation, and end-to-end delivery within a 24-hour national hackathon sprint.
- Student Leader, Red Cross Society** – Contributed to humanitarian drives, community outreach, and coordination of social welfare activities on campus. 2021
- Soft Skills:** Problem Solving · Bias for Action · Team Player · Leadership
- Interests:** Backend Infrastructure · Calisthenics · Guitar · Sketching
